

Achieving the Right Sourcing Mix with Hackett Technology Solutions' Global Delivery

Outsourcing IT functions can help lower costs, boost productivity and increase profitability. Yet many organizations are reluctant to include offshoring in their outsourcing strategy, concerned that issues such as time differences and communication barriers will harm their ability to deliver high-quality support for their ERP applications.

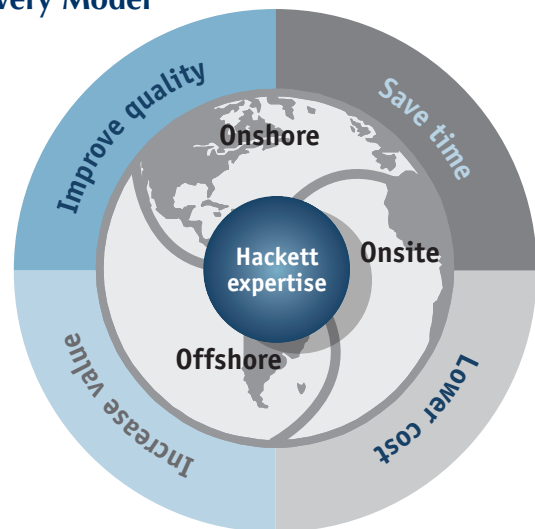

Hackett Technology Solutions' Global Delivery Center resolves these issues with a blended offshore/onshore delivery model that is unique in the industry. By offering a flexible mix of highly qualified Hackett Technology Solutions resources who work with your business application experts at your location or in India, Hackett Technology Solutions helps you strike the right balance between reducing costs and delivering high-quality application support.

Hackett Technology Solutions

Hackett Technology Solutions is a leading business and technology consulting firm that enables companies to achieve world-class business performance. We provide strategic, implementation and integration services for Oracle, PeopleSoft, and Hyperion applications, as well as business intelligence solutions.

Our unique blended delivery model offers best-of-breed and fully trained software professionals who have worked on a wide range of strategic IT projects for the Global 2000. We can assemble the right mix of software engineers, lead analysts, project managers, and solution architects to meet your requirements. These resources can be deployed on-site in your organization or located at our Global Delivery Center. In addition, Hackett Technology Solutions can scale resources to deliver an immediate or phased implementation, depending on your business needs and cost structure.
