

# Practice Overview

## Hackett Technology Solutions Hyperion / Oracle

### Hackett Technology Solutions: Enabling World-Class Performance

Hackett Technology Solutions generates more value from software because of our knowledge of best practices in Oracle / Hyperion financial and business intelligence solutions. Our proven approach helps to map world-class business performance characteristics to specific application features and requirements for key processes and modules, including:

- Modeling profitability drivers to better allocate resources across customer segments, products, and projects
- Delivering business-critical information and not just raw data to financial decision-makers
- Leveraging data from existing transactional systems and delivering it to companies' knowledge workers, developers, and analysts
- Centralizing and integrating business intelligence platforms
- Mitigating risk by ensuring alignment between technology solutions and business objectives

### Oracle EPM/Hyperion Service Offering

Hackett Technology Solutions' complete set of consulting services centers on deploying Oracle/Hyperion-based solutions that meet the unique requirements of your business environment and industry. Our specialists average 10 years of experience with certifications in various functional and technical areas supporting Oracle EPM / Hyperion.
